FOR IMMEDIATE RELEASE

FIRST TO MARKET, THE DUPLEX PACK SLIP ‘duplexpackslip’ GAINS MOMENTUM IN THE WAREHOUSE, DISTRIBUTION AND LOGISTICS INDUSTRY WITH NEW, AUTO APPLY, TWO SIDED THERMAL PRINTER & APPLICATOR

Duplexpackslip combines the shipping label, on the front side, and confidential packing slip, on the back side, into a two-sided thermal roll or fan folded label.

Chicago, IL, April 1, 2009 Bruce Raming, inventor and founder, announced today the patented duplexpackslip™ is gaining wide momentum in the material handling industry since its release at the ProMat show in January. The combination of the two-sided thermal roll label allows its users to print the shipping label on the front side and confidential packing slip on the back side **at the same time**. The new duplexpackslip operates on the patented Fox IV Technologies, Inc. TwinPrint thermal printer, the first to support two-sided thermal printing. The TwinPrint is an on(-)demand(,) “next-off” printer designed for distribution efficiency. This combination enables the shipping department of various industries to streamline cost savings and perfect the reporting accuracy to the pick, pack and shipping operation of the material handling industry.

The duplexpackslip improves? time savings, labor savings, order throughput and increased accuracy while eliminating the traditional ‘packing list enclosed’ plastic pouch and paper. “I tested the traditional packing slip system comprised of printing the packing slip, folding and inserting it into the Packing List Enclosed plastic pouch, affixing it to the carton and finally printing and matching the shipping label which also is to be affixed to the carton,” said Bruce Raming, inventor and founder of the duplexpackslip. “That process takes about 35 seconds per box.”

“The **automated** duplexpackslip process saves about 35 seconds per box,” continued Mr. Raming. “For every 1,000 boxes shipped a company will save approximately \$157.62 in labor. This includes the labor rate, payroll taxes and benefits of approximately \$16.25 per hour.” Other benefits of the new duplexpackslip include increased accuracy, reduction of inventory of shipping supplies and reduction of paper which lowers the total overall cost of the system.

The 6 x 8 duplexpackslip will accommodate about 20 lines of packing slip information. Duplexpackslip is also a ‘GOING GREEN’ solution. Details can be found at www.duplexpackslip.com.

To set an appointment to view the new duplexpackslip, contact Cherise Kennerley (marketing consultant) at 847.312.1367 or email to cherise@roi-m.com or visit us online at www.duplexpackslip.com.

About Bruce Raming, Inventor and Founder of the autopackslip and duplexpackslip

Premier Print and Services Group, Inc., based in Chicago, Illinois is where Bruce Raming has worked for over 21 years and is the inventor of the two label autopackslip and the newly announced fully automated single label duplexpackslip. The products are part of the automation process for shipping departments worldwide saving company's labor, time, supplies and money. Mr. Raming can be contacted directly at 312.980.2713 or raming@premierprint.com Visit the websites at www.duplexpackslip.com and www.autopacklist.com.
