FOR IMMEDIATE RELEASE

BRUCE RAMING, INVENTOR AND FOUNDER OF THE WIDELY-USED AUTO PACK SLIP ‘autopackslip’ RELEASES NEW BREAK-THROUGH LABEL TECHNOLOGY: THE DUPLEX PACK SLIP ‘duplexpackslip’

Duplexpackslip combines the shipping label, on the front side, and confidential packing slip, on the back side, into a two-sided thermal roll or fan folded label.

Chicago, IL, December 17, 2008 Bruce Raming, inventor and founder, announced today the general release of the new patented duplexpackslip, a combination two-sided thermal roll or fan folded label that prints the shipping label on the front side and confidential packing slip on the back side **at the same time**. The new duplexpackslip expands Mr. Raming’s commitment to streamline cost savings and perfect the reporting accuracy to the pick, pack and shipping operation of the material handling industry.

To be shown at the ProMat Show, Booth #4861 in January 2009, the duplexpackslip proves time savings, labor savings, order throughput and increased accuracy while eliminating the traditional ‘packing list enclosed’ plastic pouch and paper. “I tested the traditional packing slip system comprised of printing the packing slip, folding and inserting it into the Packing List Enclosed plastic pouch, affixing it to the carton and finally printing and matching the shipping label which also is to be affixed to the carton,” said Bruce Raming, inventor and founder of the duplexpackslip. “That process takes about 35 seconds per box.”

“The entire duplexpackslip process takes about 10 seconds,” continued Mr. Raming. “For every 1,000 boxes shipped a company will save approximately \$113.75 in labor. This includes the labor rate, payroll taxes and benefits of approximately \$16.25 per hour.” Other benefits of the new duplexpackslip include increased accuracy, reduction of inventory of shipping supplies and reduction of paper which lowers the total overall cost of the system.

The duplexpackslip label will be ready for purchase and production in January 2009. The 5 x 8 duplexpackslip will accommodate 17 lines of packing slip information.

To set an appointment to view the new duplexpackslip, contact Cherise Kennerley at 847.312.1367 or email to cherise@roi-m.com or visit Premier Print and Services Group Inc. at booth #4861 at ProMat or online at www.duplexpackslip.com.

About Bruce Raming, Inventor and Founder of the autopackslip and duplexpackslip

Premier Print and Services Group, Inc., based in Chicago, Illinois is where Bruce Raming has worked for over 21 years and is the inventor of the two label autopackslip which is fully print and apply automated

and the newly announced duplexpackslip. The products are part of the automation process for shipping departments worldwide saving company's labor, time, supplies and money. Mr. Raming can be contacted directly at 312.980.2713 or raming@premierprint.com Visit the websites at www.duplexpackslip.com and www.autopacklist.com.
